Wall Up designs **modular partitions, space dividers, temporary walls** and display panels for events, exhibitions and conferences.

Thanks to ultra-lightweight panels and a screw-free mounting system, installations are quick and effortless.

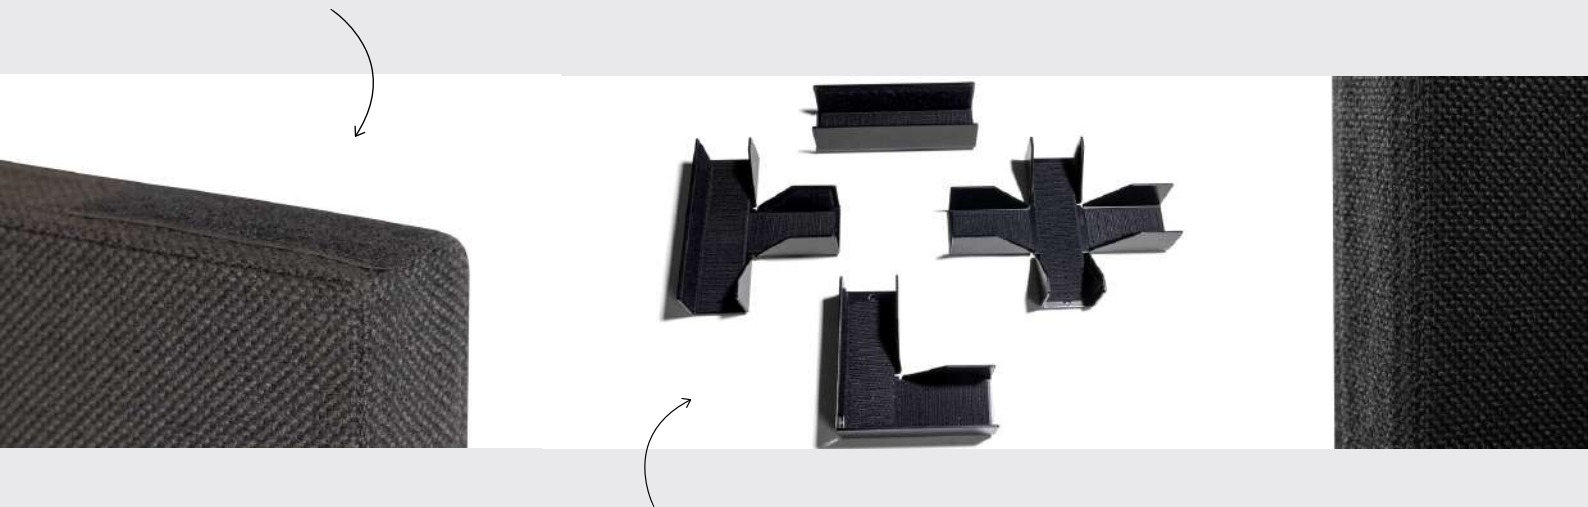

This allows for the creation of **fitting rooms, backstage areas, dividers, exhibition walls**, and any custom structure you might imagine.

All our products are **designed in France and built to last**. They offer elegant and cost-effective solutions for professionals in the event and audiovisual industries.

OUR MODULAR WALL SYSTEM

Wall Up has developed a self-supporting partition system with a **screw-free adaptive mounting system**.

The Velcro inside the connectors locks the panels together via Velcro strips sewn into the panel covers.

I, L, T and X-shaped connectors allow for all configurations.

Let your imagination run free

Combine our Walls, Technical Walls and Accessories to build fitting rooms, dressing areas, exhibition booths and much more!

Our Walls

our panels are made from flame-retardant expanded polypropylene, combining lightness, durability, and effective sound insulation. They are reinforced with an aluminum frame and covered with a flame-retardant, reinforced polyethylene sleeve. The covers are removable to ensure long-term durability.
